

THE ITALIAN WAY OF
**CONTINUOUS
IMPROVEMENT**

WHAT THE BENEFITS

Constant and continuous growth in productivity and profitability of your organization

Protection and continuous increase of your competitive margin

Utilize what you have, avoiding costly and risky investments

Achieve rapid and stable results for all your life

THE ITALIAN WAY OF CONTINUOUS IMPROVEMENT

Identifying, every day, value and non-value in organizational processes, both directly and indirectly productive ones, rapidly increasing the value generated at each step, eliminating or reducing non-value, without costly and risky investments, protecting and increasing your competitive margin: this is the Italian way of continuous improvement.

Increasing the value at each step and reducing non-value generates constant and continuous growth in the productivity and profitability of your organization.

The Valinova method does exactly this.

THE VALINOVA METHOD

Valinova adopts a systemic method to enable your people to achieve continuous process improvement every day. It supports them in progressively and rapidly developing the ability to clearly identify what is value and what is non-value in organizational processes, and most importantly, in determining how to increase value and how to eliminate or reduce non-value, then implementing the improvement, without costly and risky investments.

Your people identify unique, suitable, and congruent solutions for your real context, not replicable by competitors, thus fueling and protecting your competitive margin every day, simultaneously achieving constant and continuous growth in the productivity and profitability of your organization, FOR ALL YOUR LIFE.

The Valinova method ensures that your people achieve rapid and stable results, training them to act by thinking and think by acting, constantly anchored to real processes.

VALINOVA **microLAB**

- 30-minute flexible sessions, tailored to what is needed to clearly identify the next step.
- Our specialists work with your people exclusively remotely:
 - One-to-one
 - Learning the method is exclusively experiential: no lessons, no chatter, absolutely no groups, never in person. Your people learn by doing.
- Minimal time commitment: rapid results.
- Zero logistics and travel costs.
- No disruption to current operations.
- No consultants roaming around the company.

SUCCESS STORIES AND CASE STUDIES

Reports of some of our interventions can be found on LinkedIn and on our website, valinova.it.
